Mavensoft Systems Pvt Ltd, Hyderabad, Telangana

Skills:

Web technologies : **ASP.NET CORE WEB API, ASP.NET MVC, ASP.NET, ADO.NET.**
Database And ORM : **MS SQL SERVER AND ENTITY FRAMEWORK.**
FRONT-END : **HTML, CSS, JAVASCRIPT, BOOTSTRAP.**

Projects:

Project #1: Farm Star

Client: Don dollilio Oct 2023 – Present
Type: .NET Core Web-API (Back-end)

Technologies: Visual Studio 2022, C#, .NET Core Web API, Entity Framework Core, .NET 6.0, 7.0, MS SQL Dapper.

Responsibilities:

- Created .NET Core Web API Controllers with LINQ queries for data operations.
- Implemented NFR's like Logging, caching framework.
- Wrote Stored Procedures, Dapper queries, and Entity Classes.
- Tested APIs using Swagger UI and debugging through all the utilize classes.
- Implemented authentication and authorization such as JWT.
- Collaborated with team members and assisted with configuration changes.

Project #2: Air Niugini

- Client: Destinations. Feb 2023 – Aug 2023

- Type: Web application

- Technologies: Visual Studio 2019, jQuery, MySQL, C#, ASP.NET, MS Test, nLogger

- Summary: The project aims to facilitate online flight ticket booking to various destinations, while offering rewards points for every journey. These points enable users to redeem products or hotel stays provided by the destination company.

- Responsibilities:

- Worked on Travel Diary Memories module for saving user journey details and claiming prizes from Destinations company.
- Managed code repository including check-ins, checkouts, labeling, and conflict resolution.
- Designed technical solutions with functional and technical mapping matrices.
- Maintained progress and status reporting for both internal and client stakeholders.
- Implemented client-side validations using jQuery and JavaScript within the Controller.
- Created .NET classes for Business Logic Layer using C#.
- Optimized queries, stored procedures, functions, and triggers using MS SQL.
- Developed admin login-related reports for Destinations using jQuery data tables.

Project #3: TSCAB - HRMS

- Client: Telangana State Co-operative Apex Bank

May 2022 – Dec 2022

- Type: Web application

- Summary: Tracked Employee Activities, Leave Management, and HR Reports.

Responsibilities:

- Developed a complex web application using MVC Design Pattern.
- Implemented Client-Side Validations, AJAX, and JSON.
- Utilized N-Tier Architecture for modularity.
- Writing Stored Procedures, Views, and Queries to Fetch data from Db
- Write LINQ queries in C# Classes using Entity Framework.
- Developed Reports for Payroll using jQuery Data Tables and C#.
- Managed code with SVN, GitHub.

Accomplishments:

- Debugged and resolved challenging issues.
- Contributed to C# classes and web services.
- Met deadlines for high-priority defects.
- Provided quick resolutions for production-level issues.
